

GETTING STARTED WITH SNYK

Start scanning your code today with the Snyk developer security platform

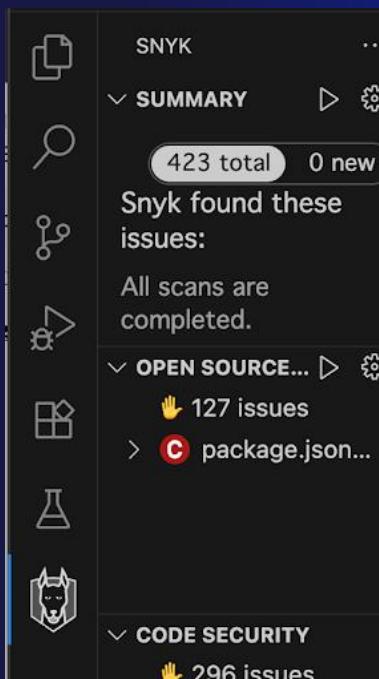

Create your account:

1. Visit snyk.io/plans and click on 'Start free'
 - a. This page holds useful information about your free plan, included # scans you are offered per month.
1. The 'start free' link will bring you to a page that looks like the one on the right.
 - a. Create your Snyk account through GitHub or a Google account. For students, integrating your Snyk & GitHub accounts is a good option as it will allow you to use both your university and personal email address for post-graduation projects.

You can use Snyk with VS Code, Eclipse, and JetBrains

Download the Snyk IDE plugin in VS Code!

1. Download VS Code at code.visualstudio.com/download (here).
2. Click on the Extensions icon in the Activity Bar on the side.
 - a. You can also use the keyboard shortcut `Ctrl+Shift+X` (on Windows/Linux) or `Cmd+Shift+X` (on macOS).
3. In the search bar at the top of the Extensions view, type "Snyk"
4. Install the plugin – it should be listed as something like "Snyk Security - Code, Open Source, IaC configurations"
5. Click on the extension on the left side bar (dog icon to the left) and scroll down to authorize the account.
6. You will be prompted if you need to grant additional access to code scanning.
7. Once everything is set-up, open your project in VS code. When you want to scan your project, navigate to the sidebar and hit the play button to scan.

Thank you for using our software and educational content!
Be sure to check out docs.snyk.io for more info.
